STRUCTURAL ENGINEER

PERSON SPECIFICATION

Introduction

A Structural Engineer is required to carry out structural design in steel, concrete, timber and masonry; inspections of existing buildings and drawing work on structural projects using AutoCAD.

Short-listed candidates will be asked for interview which may also include a short written examination.

The successful applicant will be an ambitious, hard-working and dedicated person with minimum qualifications of a good MEng in Structural or Civil Engineering and with at least 1 year's relevant experience since gaining those qualifications. Evidence of good IT skills is also required.

An attractive salary (including a non-contractual bonus) will be offered to the successful applicant.

Essential Minimum Requirements

- a) A friendly and likeable disposition, with a good sense of humour.
- b) MEng (Level 1 or 2.1) in Structural Engineering or in Civil Engineering.
- c) Design ability in steelwork and concrete, both manually and using computer design packages
- d) 1 year's relevant experience in structural design, preparation of drawings and inspection of building structures.
- e) Good draughting ability using AutoCAD.
- f) Good reporting skills.
- g) A logical approach to problem solving.
- h) Good IT awareness, ability and experience.
- i) Good written and verbal communication skills.
- j) Awareness of relevant health and safety legislation.
- k) Ability to organise and prioritise workload.
- l) Desire to learn and to develop career.

Desirable Requirements

- a) Ability to drive and possession of a current clean UK driving licence.
- b) Site experience.
- c) Experience in the preparation of contract documents, specifications, etc.
